REPORT

The Information Technology program is designed to provide the basic foundation, skills, and knowledge for computer networking, applications, and support, along with an introduction to programming. Students will develop the skills necessary to prepare for certification exams and will learn how to develop, support, and integrate computing systems. They will acquire network planning and management skills and the ability to provide technical support. The program will provide hands-on experience in computer systems support and skill in network setup and maintenance.

The Information Technology program enhances intellectual and professional development of students.

Objectives:

The main objective is to introduce IT in a simple language to all undergraduate students, regardless of their specialization.

It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry.

The focus of the subject is on introducing skills relating to IT basics, computer applications, programming, interactive medias, Internet basics etc.

Learning Outcomes:

At the end of this course, student should be able to

- (a) Understand basic concepts and terminology of information technology.
- (b) Have a basic understanding of personal computers and their operations.
- (c) Be able to identify issues related to information security.

Certificate Course Information Technology
 Year-2018-19

REPORT

The Information Technology program is designed to provide the basic foundation, skills, and knowledge for computer networking, applications, and support, along with an introduction to programming. Students will develop the skills necessary to prepare for certification exams and will learn how to develop, support, and integrate computing systems. They will acquire network planning and management skills and the ability to provide technical support. The program will provide hands-on experience in computer systems support and skill in network setup and maintenance.

The Information Technology program enhances intellectual and professional development of students.

Objectives:

The main objective is to introduce IT in a simple language to all undergraduate students, regardless of their specialization.

It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry.

The focus of the subject is on introducing skills relating to IT basics, computer applications, programming, interactive medias, Internet basics etc.

Learning Outcomes:

At the end of this course, student should be able to

- (a) Understand basic concepts and terminology of information technology.
- (b) Have a basic understanding of personal computers and their operations.
- (c) Be able to identify issues related to information security.

Certificate Course Information Technology
 Year-2019-20

REPORT

The Information Technology program is designed to provide the basic foundation, skills, and knowledge for computer networking, applications, and support, along with an introduction to programming. Students will develop the skills necessary to prepare for certification exams and will learn how to develop, support, and integrate computing systems. They will acquire network planning and management skills and the ability to provide technical support. The program will provide hands-on experience in computer systems support and skill in network setup and maintenance.

The Information Technology program enhances intellectual and professional development of students.

Objectives:

The main objective is to introduce IT in a simple language to all undergraduate students, regardless of their specialization.

It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry.

The focus of the subject is on introducing skills relating to IT basics, computer applications, programming, interactive medias, Internet basics etc.

Learning Outcomes:

At the end of this course, student should be able to

- (a) Understand basic concepts and terminology of information technology.
- (b) Have a basic understanding of personal computers and their operations.
- (c) Be able to identify issues related to information security.

Certificate Course in C Programming Language
 Year-2019-20

REPORT

This course is aimed at advancing concepts of programming and software code organization within the framework of structural and procedural programming paradigms. The course is organized as a series of lectures, hands-on and exercises using C programming languages.

The course is designed to provide complete knowledge of C language. Students will be able to develop logics which will help them to create programs, applications in C. Also by learning the basic programming constructs they can easily switch over to any other language in future.

Objectives:

The main objective is to introduce C programming language in a simple language to all undergraduate students, regardless of their specialization.

- Understand the concept of an algorithm
- To understand Programming basics and the fundamentals of C
- To make the student learn a programming language.
- To learn problem solving techniques.
- Understand the concept of a program.

Learning Outcomes:

At the end of this course, student should be able to

- (a) Develop a C program.
- (b) Control the sequence of the program and give logical outputs.
- (c) Manage I/O operations in your C program.
- (d) Apply code reusability.

Certificate Course in C Programming Language
 Year-2021-22

REPORT

This course is aimed at advancing concepts of programming and software code organization within the framework of structural and procedural programming paradigms. The course is organized as a series of lectures, hands-on and exercises using C programming languages.

The course is designed to provide complete knowledge of C language. Students will be able to develop logics which will help them to create programs, applications in C. Also by learning the basic programming constructs they can easily switch over to any other language in future.

Objectives:

The main objective is to introduce C programming language in a simple language to all undergraduate students, regardless of their specialization.

- Understand the concept of an algorithm
- To understand Programming basics and the fundamentals of C
- To make the student learn a programming language.
- To learn problem solving techniques.
- Understand the concept of a program.

Learning Outcomes:

At the end of this course, student should be able to

- (a) Develop a C program.
- (b) Control the sequence of the program and give logical outputs.
- (c) Manage I/O operations in your C program.
- (d) Apply code reusability.
